WELD-ON TECHNICAL TRAINING

Our training program is designed into 3 MODULES and can be tailored to fit your organization's needs:

SEMINAR MODULE

CLASSROOM TRAINING

- The basic principles of solvent welding pipe and fittings
- Techniques per ASTM D2855 standard
- How to choose the right solvent cement for the job
- Causes of joint failure
- Safety precautions

FIELD PRACTICE MODULE

HANDS ON TRAINING

- Interference fit check between pipe and fitting
- Pipe-end deburring
- Primer application
- Solvent cement application
- Pipe joint assembly

BONDER MODULE

- Participant makes a pipe joint assembly
- The assembled sample is hydrostatically pressure tested per **ASME B31.3** bonder qualifications standards
- If the sample passes the pressure test, a qualification card is issued to the participant*

**There are increasing numbers of contracts specifying that bonders be qualified to the ASME B31.3 standard. Qualification may lead to a decrease in incidents and reduced liability insurance premiums.*

WHICH (FREE) TRAINING IS BEST FOR YOU?

BASIC TRAINING*

Seminar Only (30 minute in-person classroom & online webinar options available)

For small groups and individuals wanting to learn the basics of solvent welding.

**Basic Training (Seminar & In-Field) is also available through your agency representative. Contact them directly to request training.*

IRRIGATION TRAINING

Seminar + Field Practice + Optional Irrigation Bonder Qualification

For irrigation and pool industry professionals requiring comprehensive hands-on training and certification when required.

INDUSTRIAL TRAINING

Seminar + Field Practice + Industrial Bonder Qualification

For industrial and commercial plumbing professionals requiring comprehensive hands-on training and qualification.

Weld-On technical service professionals are active members of the American Welding Society, Plastic Pipe and Fittings Association, ASTM International, ASME and Irrigation Association.
